plaints generally, and especially for removing those obstructions which are the source of their ailments at certain periods; they possess the eminent advantage over most other purgatives, that, while they operate gently, they produce neither cosaveness, debility, or too great excitement.

Whenever there is a predisposition to receive disease from marsh effluvia, or from a too copious use of ardent spirits, or from a vitiated state of the bile, these pills will assuredly counteract it.

They are highly recommended to travellers by sea or land, and may be made use of with safety without change of diet, and in situations where no exercise can be used. They will be found particularly valuable for preventing diseases incidental to hot climates; they deterge and cleanse viscid humors, open obstructions, and promote the secretion of good bile, operate as an easy cathartic, as a powerful diuretic, and as a diaphoretic.

Dr. Dyott, under the strong conviction of the power of his pills to relieve the afflicted, recommends the use of them to those who are in health as well as the afflicted, at leace once a fortnight, during the spring and summer months, in which he feels assured those who attend to his advice will find the benefit they seek.
